Scope and Content of Collection

The papers document the career and life of Eric Voegelin, a German-American philosopher and political scientist. The collection includes correspondence, speeches and writings, reports, memoranda, conference proceedings, photographs, and printed matter related to the philosophy of history and the philosophy of science. The material is arranged in two similar groups, with incremental materials dating from 1901 to 1996.

Eric Voegelin was born in Germany in 1901. He moved with his family to Austria in 1910, going through the habilitation and privatdozent processes at the University of Vienna, where he became a professor. When Nazi forces annexed Austria in 1938, Voegelin fled to Switzerland, and then immigrated to the United States, where he was naturalized in 1944. The **Biographical file** provides documentation on Voegelin's life, including materials related to his move to the United States, anniversary tributes and memorials, and honorary degrees.

Voegelin was a prolific author, publishing works in German and English. **Speeches and writings** include drafts, correspondence, and notes for such works as the multi-volume *Order and History* and *History of Political Ideas*, which was published after Voegelin's death.

Voegelin taught at several universities in the United States and abroad, including the University of Vienna, Harvard University, Bennington College, the University of Alabama, Louisiana State University, and the University of Munich. **Course material** contains Voegelin's lecture materials, syllabi, and reading lists for courses that he taught.

While in Munich, Voegelin founded the Institut für Politische Wissenschaft, which was later renamed the Geschwister-Scholl-Institut für Politische Wissenschaft (Universität München). The **Office files** include documents related to this institution, such as correspondence, reports, and minutes.

In 1932, Voegelin married Lissy Onken, also known as Luise Betty Voegelin. The **Incremental Lissy Voegelin file** contains correspondence (some of which concerns Voegelin and his writing) and appointment books.

The **Photographs and postcards** in the collection have a focus on artifacts, with images from sites and cultures around that world. One folder of artifact photographs bears the name of Marie König, who has been cited as an influence on Voegelin in the area of Stone Age symbolism (Cooper). Negatives in the collection contain scenic views of Yellowstone National Park, Niagara Falls, Stanford University, Vienna, and various cities in the United States.

The majority of the incremental materials in the collection are described in an inventory of the estate of Lissy Voegelin. Inventory numbers within the container list refer to the original numbers given to materials in this inventory, which can be found with the Eric Voegelin finding aid in the Hoover Archives reading room.
